**Sorigué is a dynamic group of leading companies
in the construction, services, technology
and water engineering sector, with a clear commitment
to innovate and improve society.**

Sorigué

Founded in 1954, it has its origins in manufacturing aggregates and asphalt treatment. Throughout the years the company has undergone a steady, continuous growth, along with an increase in turnover, staff and means of production, having as a result the opportunity to diversify in other areas.

In these 60 years, the group has evolved to respond to market demands, maintaining excellent relationships with its customers and suppliers, allowing the company to reinvest in technical and human resources. Sorigué has kept a leading role developing new products and working methods, in constant evolution in order to create value in each part of the process and, innovating pursuing excellence.

Sorigué has developed a comprehensive business model with offices located in all major Spanish cities, operating throughout Spain and completing important projects.

Fundació Sorigué

**The Sorigué Foundation furthers
the business group's desire
to give back to society through
different activities with
a clear social, educational
and cultural commitment.**

PLANTA

**PLANTA is a meeting point between the
Sorigué company and its Foundation.
It is a project that encompasses
Sorigué's commitment to giving back
to society, to its values
and to the future.**

Sorigué Foundation

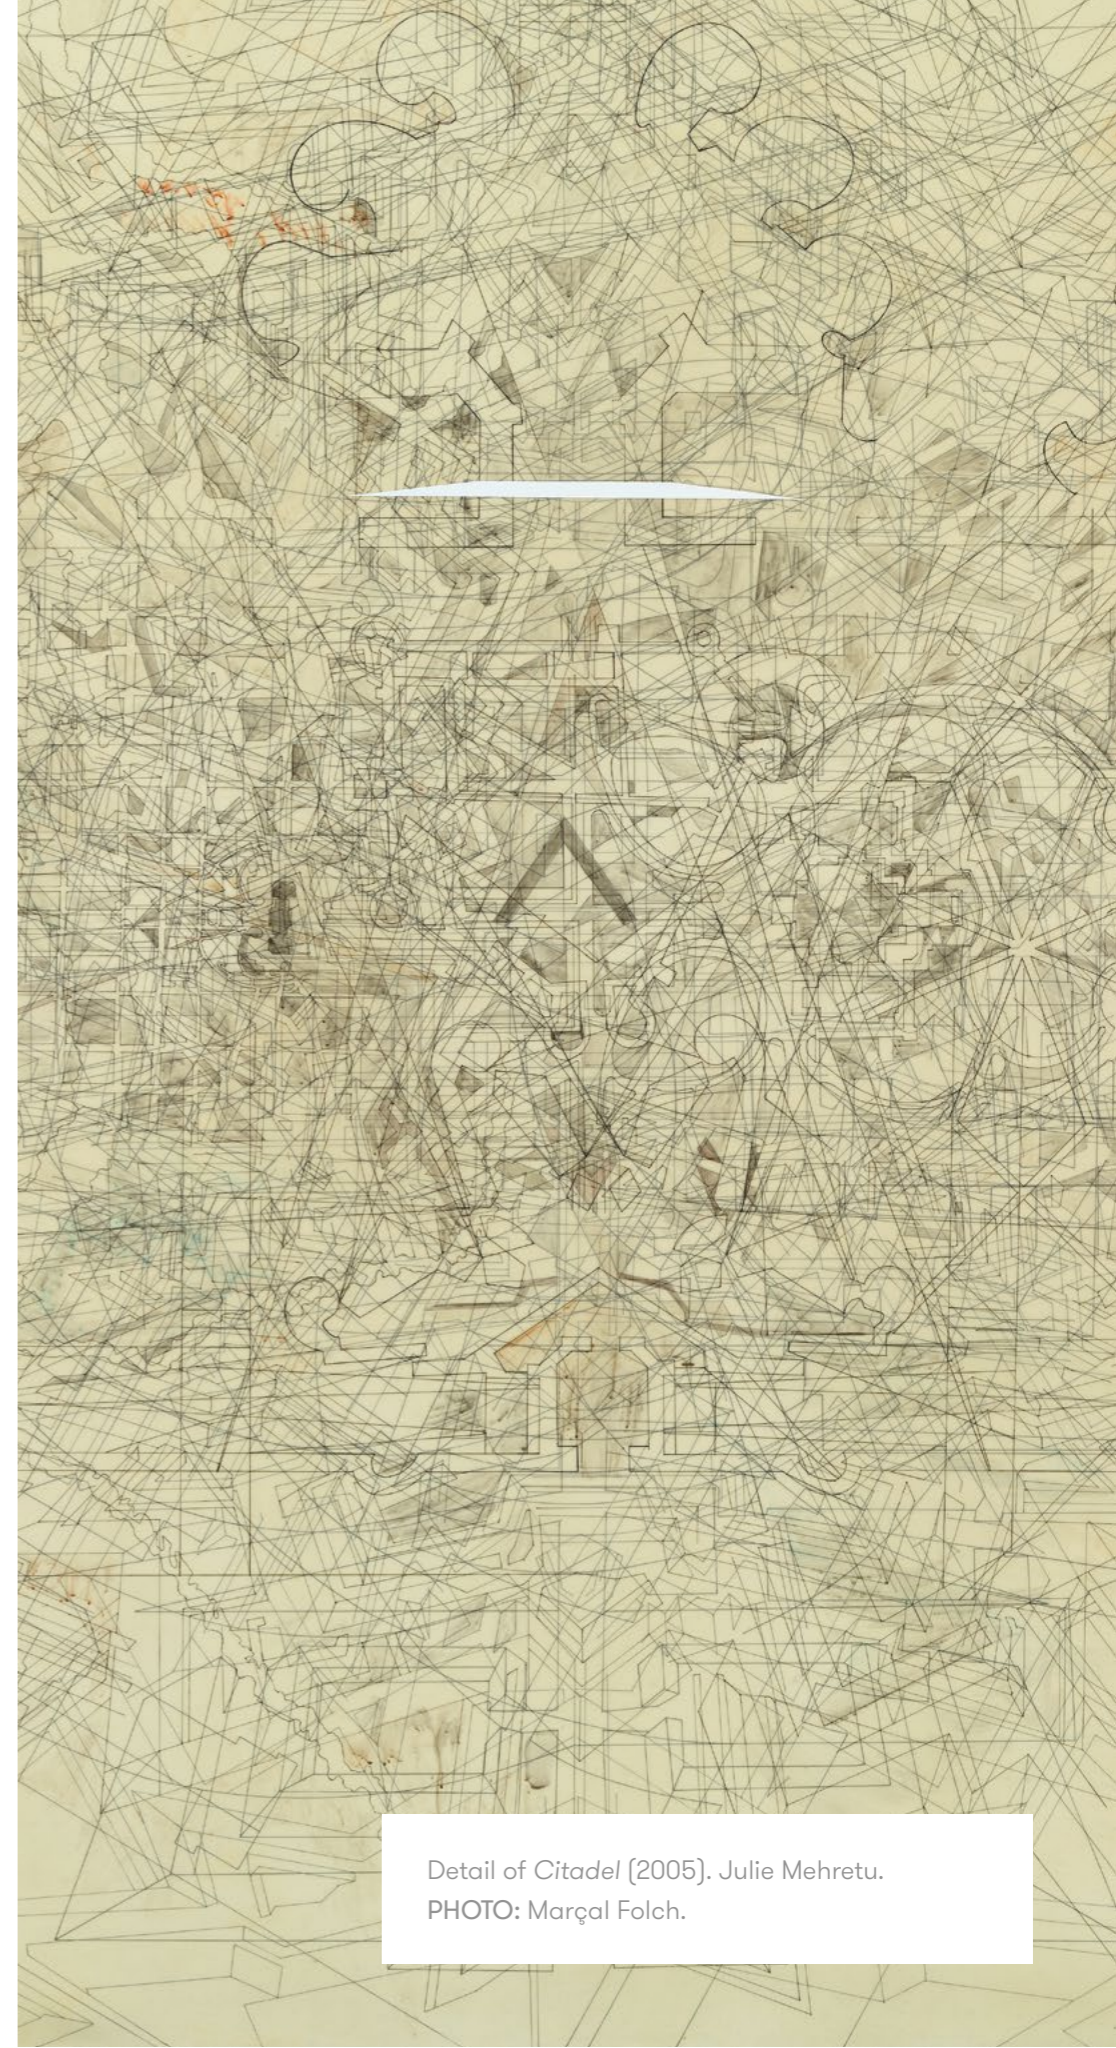

Social Commitment

Since 1992, the Sorigué Foundation manages an occupational centre for the mentally disabled, providing assistance to more than fifty young people.

The building was opened in 1991 by the president of the Government of Catalonia. The foundation also takes part in different welfare activities collaborating with various social projects promoted by public and private institutions.

Cultivating talent

In the educational field, the Sorigué Foundation promotes a scholarship system that aims to support young talents in their effort and personal commitment to succeed.

Detail of *Citadel* (2005). Julie Mehretu.
PHOTO: Marçal Folch.

Art collection

Over the last 15 years the Soriguē Foundation has created one of the most important contemporary art collections in Spain, receiving the Arts and Patronage Award, by “la Caixa” Foundation, in May.

Among the internationally acclaimed artists featured in the collection, names such as Anselm Kiefer, William Kentridge, Bill Viola, Chuck Close, Anish Kapoor, Antonio López, Daniel Richter, Antony Gormley, and Julie Mehretu resonate.

The Soriguē Foundation stays very active in its policy of lending to national and international institutions.

It has lent works to renowned institutions such as the Thyssen-Bornemisza Museum in Madrid, the Museum of Modern Art (MoMA) in New York, the Fine Arts Museum in Bilbao, the Albertina Museum in Vienna, the Santa Monica Museum of Art in California, Tate Liverpool, the Andalusian Centre for Contemporary Art (CAAC) in Seville, Arts Santa Mònica in Barcelona, Palazzo Fortuny in Venice, and the Museum of Fine Arts in Boston, among others.

Currently the collection is developing new proposals by specific prominent artists such as Bill Viola, Wim Wenders and Chiharu Shiota, for the PLANTA Project.

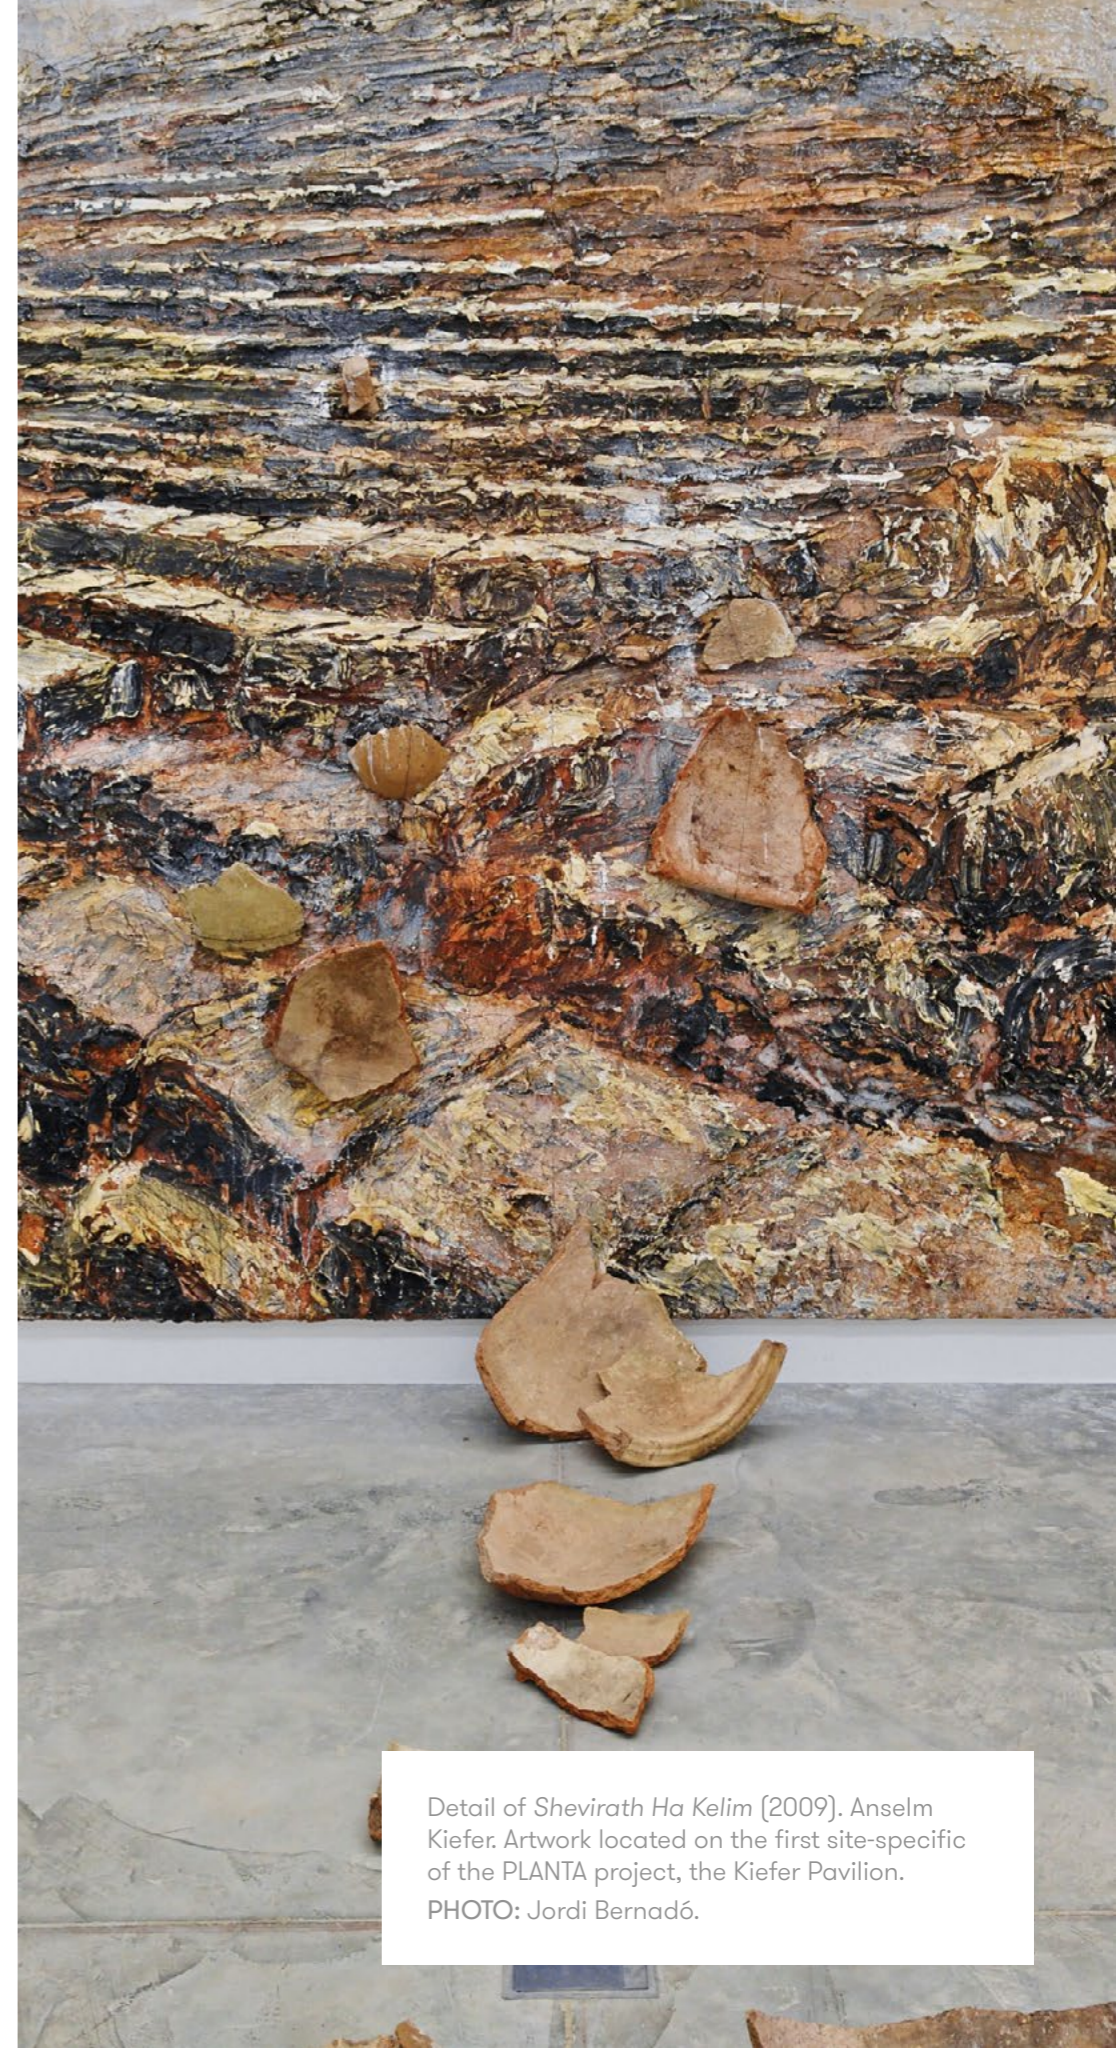

Detail of *Piggyback Sequence* (2001).
Juan Muñoz.
PHOTO: Gasull Fotografía.

PLANTA

Business and creativity

PLANTA will be a place to exchange and promote innovation and knowledge, creating synergies between creativity and the business world.

Located in an industrial complex in La Plana del Corb (Balaguer, Lleida), PLANTA will be built to blend with the natural landscape, using stone extracted from the gravel pit on the same site and transformed into concrete. It will be an open space in which to think, research and innovate and will serve as the new headquarters of the company and the foundation.

Detail of *Shevirath Ha Kelim* (2009). Anselm Kiefer. Artwork located on the first site-specific of the PLANTA project, the Kiefer Pavilion.
PHOTO: Jordi Bernadó.

Innovation

The company is committed to a sustainable innovation model, which allows development while at the same time protecting the knowledge acquired.

Sorigué fosters an innovative approach that results in the development of new ideas for products and services, ongoing trend analysis, buying and selling technology, as well as R&D+i project management.

The Innovation Advisory Board

Sorigué has created an Innovation Advisory Board. The purpose of this new organization is to help create an ecosystem that enables internal and external projects and acts as a “radar” in the search for potentially profitable national and international trends in areas where Sorigué works, as well as new emerging fields of interest.

The members of the Advisory Council are: Ana Vallés, President of Sorigué, and professionals of renown in their fields: Rolf Tarrach, President of European University Association (EUA); Lluís Torner, Director of the Institute of Photonic Sciences (ICFO); Núria Sebastián, Vice President of the European Research Council (ERC) and Marcos Urarte, strategic advisor and expert in innovation.

Control test: determining the softening point of bituminous binder.
PHOTO: Sònia Tapiolas.

Research laboratory

Sorigué has historically been recognized as a benchmark for the quality of its products in the asphalt and aggregates industry. In its commitment to innovation and sustainability, in 2010 Sorigué created its own research laboratory, with a clear aim to deepen its knowledge of different materials and consolidate its experience, creating an internal control centre for materials manufactured onsite.

This control centre located in the industrial complex of La Plana del Corb, has a highly qualified technical team, provided with the latest equipment and modern technologies used for testing materials which can only be found in specialized laboratories. The laboratory work focuses on three areas: control, design and research.

Control test to determine the penetration level of a bituminous binder.
PHOTO: Sònia Tapiolas.

Awards and Recognition

Among the awards given to Sorigué, those that stand out are the **Emulsar International Prize 2010** for scientific research in bituminous emulsions, and the EU recognition for the **Phoenix Project**, the largest investigation in the field of asphalt pavements in Spain.

Between 2012 and 2014, the research laboratory have carried out two R&D+i projects among others:

- > **High performance bituminous mixtures made with new technologies at low temperature (MB2t).** A consortium of five companies led by Sorigué developed it. This project had the support of Spain's Higher Council for Scientific Research (CSIC) and the funding of the Centre for Industrial Technological Development of the Ministry of Science and Technology (CDTI).
- > **Efficient milling.** Carried out exclusively by Sorigué, investigating the increase of efficiency in recycling at the plant.

Sample preparation for the separation of bituminous binder components by chromatography.

PHOTO: Sònia Tapiolas.

People

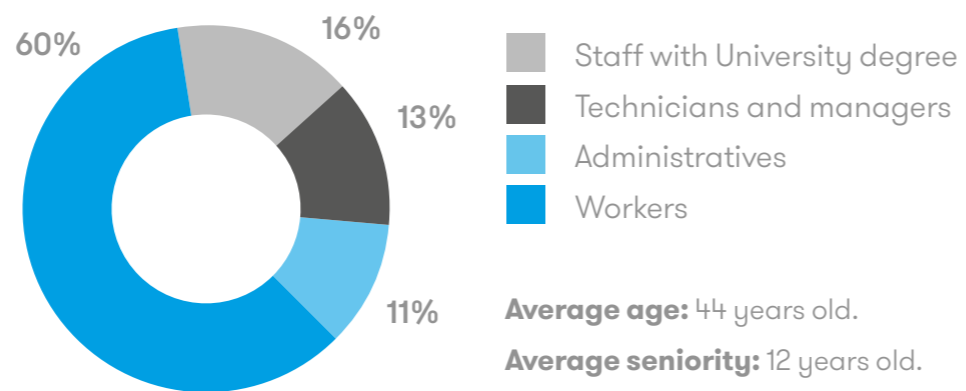

**People are one of the main pillars
of Sorigué's business policy,
aiming to grow as a company
by empowering its workers.**

People

The company is committed to encourage the development of its staff through a cooperative interaction that enables synergies between all members of the organization.

In order to join forces, move in the same direction and achieve high performance standards, Sorigué has identified some corporate skills, which are essential for all positions.

Sorigué staff

Customer orientation and service is a key skill for all the employees in the organization.
PHOTO: Sònia Tapiolas.

Corporate skills

Teamwork and networking. Collaborative culture.

It involves cooperation and collaboration on projects for achieving shared objectives, where all employees feel part of the company.

Integrity and honesty

Act according to ethical and social standards, mentioned in the code of ethics of the organization, emphasizing loyalty, honesty and sincerity.

Flexibility and adaptation to change

The ability to change personal behaviour to achieve certain goals when changes take place.

Customer orientation and service

Exceed customer expectations, both internal and external, providing the most appropriate solutions to meet their needs.

Commitment and loyalty

Guide interests and personal motivations to corporate values. It expresses the degree of commitment and involvement with the group project.

Sorigué worker asphaltting the street
Josep Pla in Barcelona.
PHOTO: Jordi Bernadó.

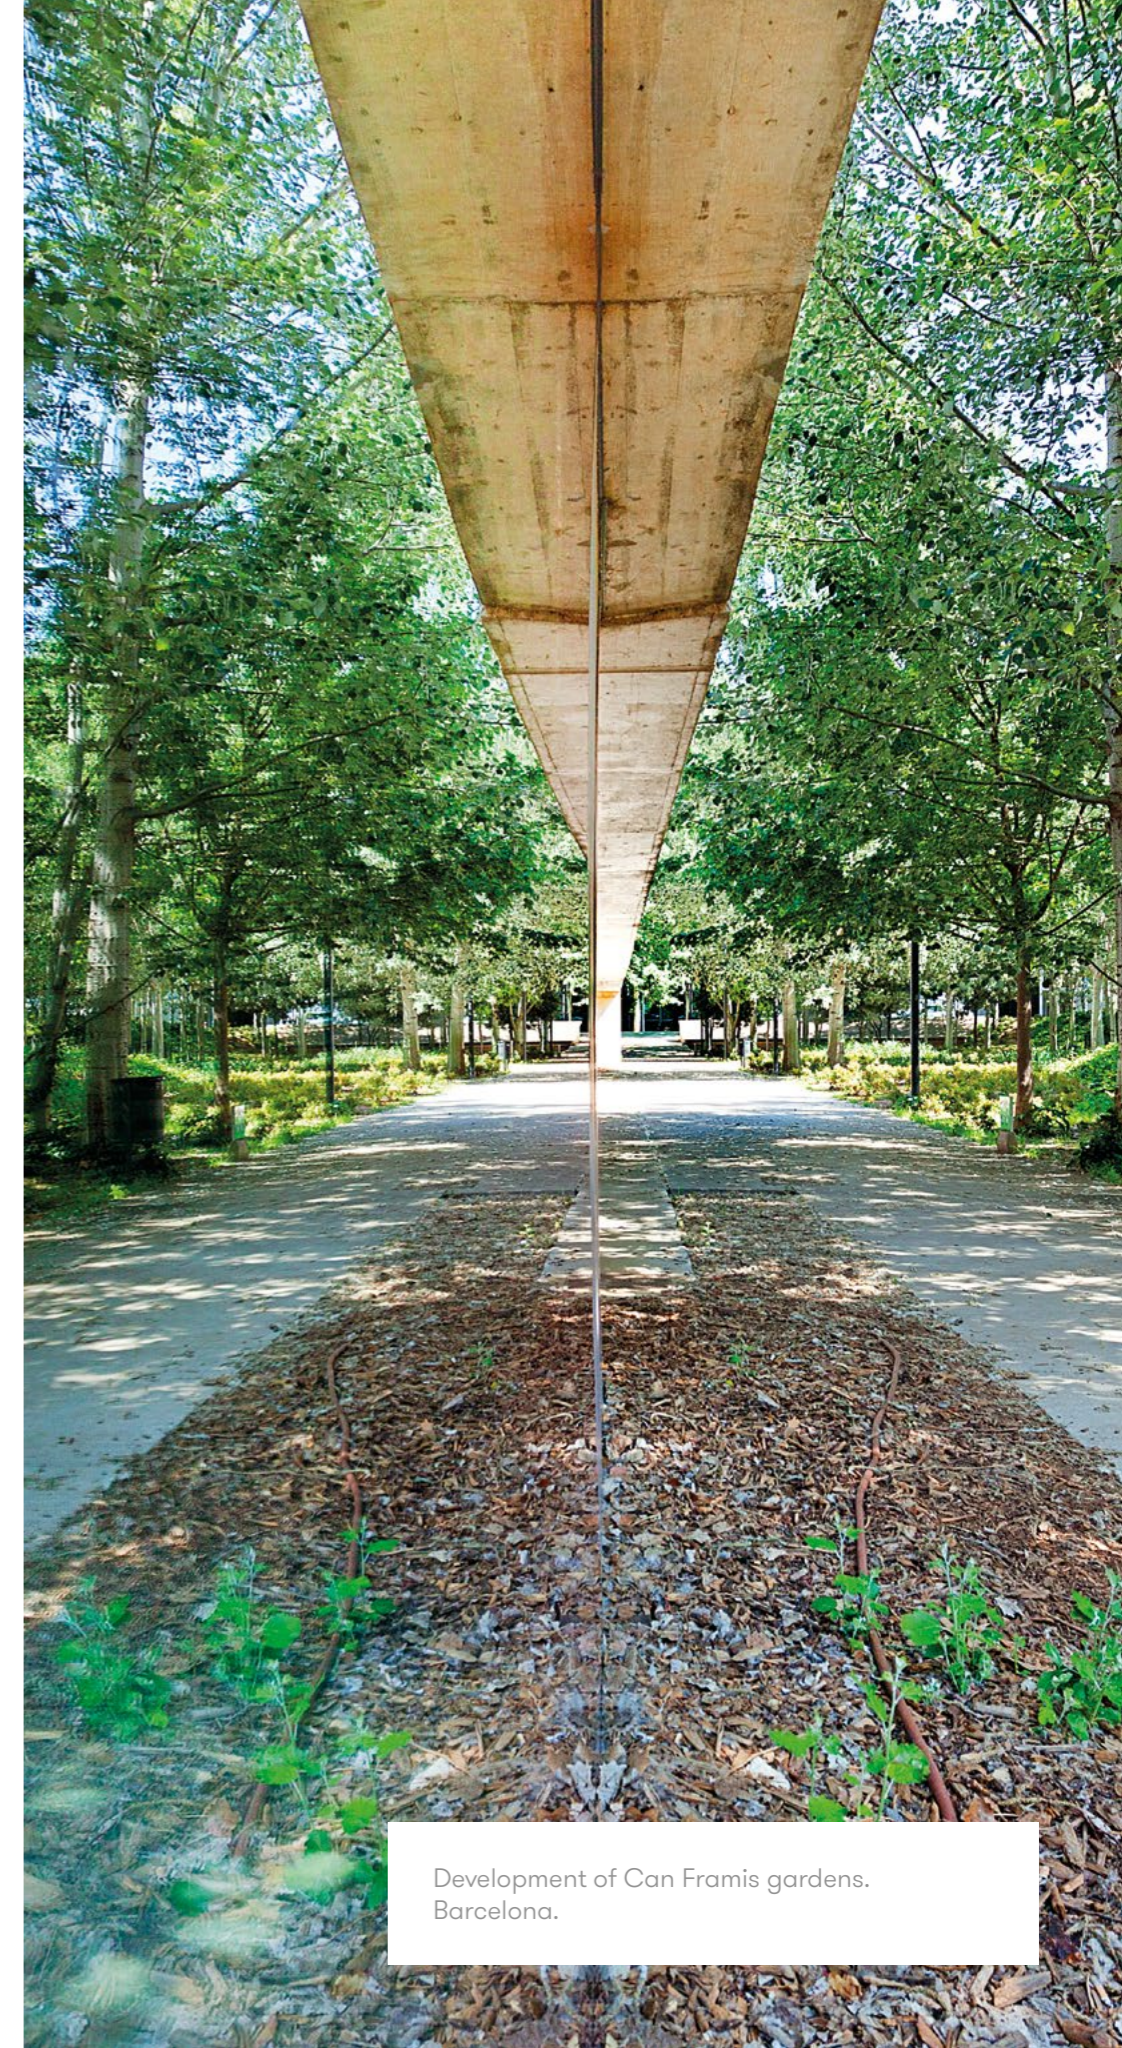

Sustainability

Sorigué thinks of sustainability in three areas: social, environmental and business. It supports it through the innovation and the knowledge that the organization has acquired in all of its activities.

Sustainability

The group works to grow its business in a sustainable way. Sorigué is committed to share this growth with its clients and partners through solutions, knowledge and transverse experience.

< Back | [Read more](#) —>

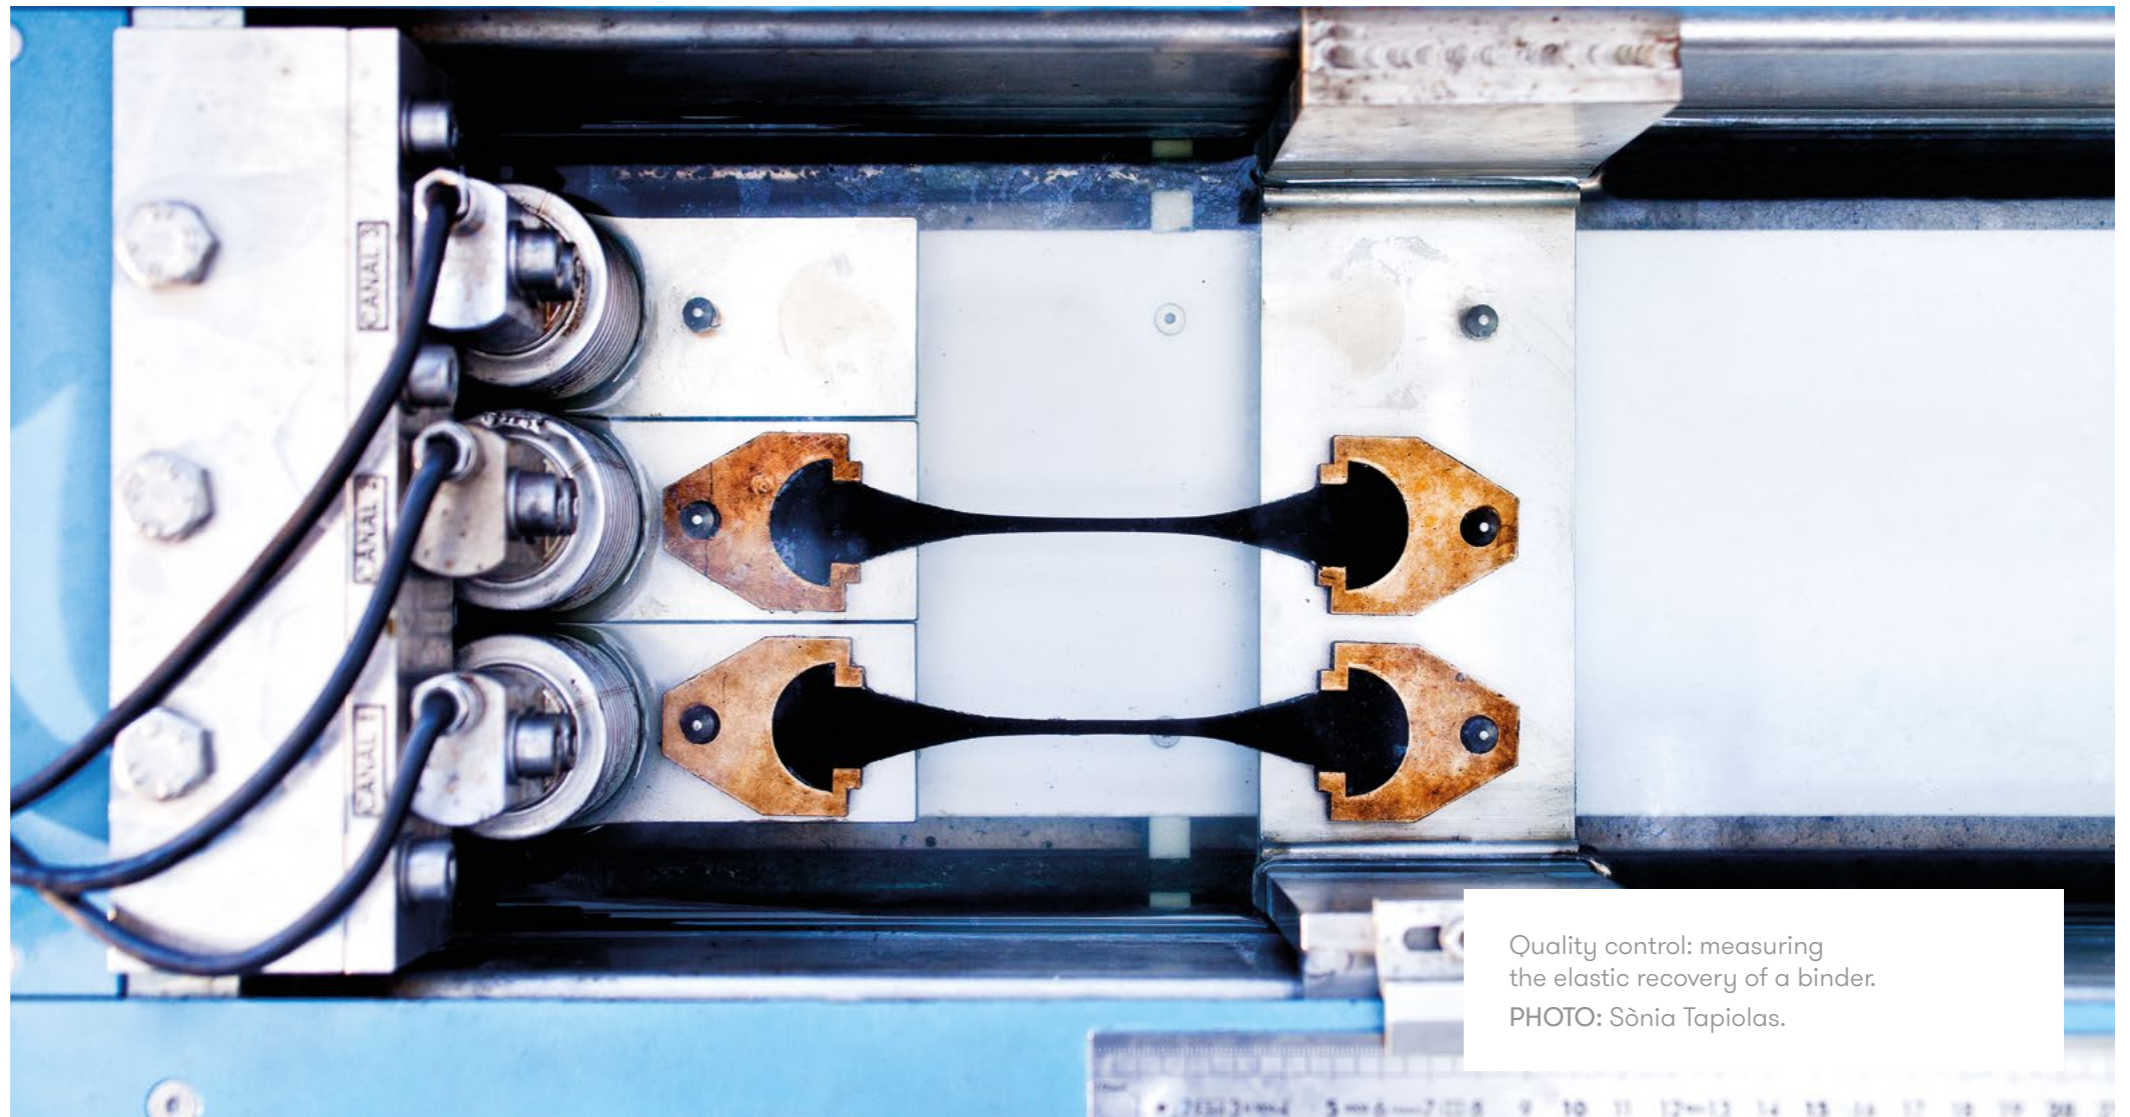

Development of Can Framis gardens.
Barcelona.

Quality

Sorigué maintains a commitment to improve and innovate in the quality of its products and services in order to ensure full customer satisfaction and environmental care.

The company integrates in its management and development processes the principles of quality, environmental protection, safety and health through fulfilling reference standards, which are applicable throughout the value chain.

Quality control: measuring the elastic recovery of a binder.

Own resources

One of the group's main strengths is the great capacity of its own means of production, which guarantees its presence and activities throughout the value chain.

Own resources

Its constant growth during six decades has resulted in Soriguē having production facilities and specialized machinery with a high competitive advantage. In addition, following its commitment towards sustainability, in recent years it has added to its diverse fleet a large number of electric vehicles.

Aggregates

The company manufactures, sorts and distributes all types of aggregates for the construction industry. Specialized in the production of polygenic aggregates, suitable for making concrete, mortar, bituminous mixtures and granular layers, and porphyry type, especially for railway infrastructure and high performance surfaces.

Soriguē has five active quarries for extraction and treatment of aggregates, with a capacity of 6,000,000 tons / year.

Plataform Distribution

The group has a plant which stores and distributes all kinds of aggregates and building materials, with the possibility of personalizing different formats of packaging which adapts to the needs of each client, from small constructors to large construction distribution stores. Total quality control of the aggregates: from the quarry to the customer.

Hydraulic equipment

An international leader in design, manufacture, assembly and maintenance of machinery and equipment for water treatment: the company has carried out projects in over 30 countries. Each product is unique; the engineering department develops solutions tailored to each client. All equipment is made from European materials and is highly respected in the market for its high reliability.
