

Aggregate suitable for mortars, granular subbase and layers treated with hydraulic aggregates.  
AF - 0/2- R

**Very fine aggregate** that undergoes grinding and classification; siliceous rock-based composition, regular and homogeneous texture, very low fine content and high sand equivalence.

### Applications

- / Mortar production.
- / Non-structural concrete production.
- / General building uses.
- / General gardening uses.
- / Specific uses of filling granular subbase in public works and infrastructures.
