

Betulo 20x10x8

The future is built step by step from the strongest foundations in the present.

We offer the widest range of state-of-the-art paving on the market. Our models, colours and finishes combine to provide highly exclusive designs in the most emblematic spaces.

Features

This is the cobblestone par excellence; the most widely used thanks to its versatility and ease of placement. Industrias del Cemento Aglomerado (ICA) pioneered industrial prefabrication of cobblestones in Spain, and the Betulo Cobblestone was one of the first on the market. Now, after the experience acquired over 40 years, we manufacture the state-of-the-art Betulo cobblestone, incorporating the latest advances in small format paving; double highly resistant layers, with fully tested and proven non-slip and wear-resistant properties.

Their format is ideal for combining all the types of stones in our range to create a wide variety of geometric shapes. Ideal for pedestrian or light traffic zones. They are available in a wide variety of colours, in both the mix and basic series, with a stone paint finish.

Family: Cobblestones	Trademark: ICA	Production centre: Sant Andreu de la Barca	Type of packaging: Pallet 7.68 m ²
Subfamily: Betulo
