

4/8 washed natural stone

Washed natural stone for children's parks and recreation areas.

Washed natural stone is an aggregate obtained from natural aggregates in the La Plana del Corb gravel pit by vibratory screening and washing with cyclones.

Washed natural stone (R-4/8-L)

The production process provides a no-fine grain, making it ideal for use as gravel in children's parks. The grain size complies with standard UNE-EN 1177 which regulates characteristics for gravel as a coating for surfaces in children's play areas. It is also used decoratively in gardens and paths.

Family:
Natural aggregates

Trademark:
Soriguē

Production centre:
La Plana del Corb

Type of packaging:
Bulk
