Cost

€10,577,168.44 excluding VAT

Location

Lleida

Period of service

April 2021 – April 2025

Works management

Generalitat de Catalunya

Scope

Surveillance, maintenance, programming, monitoring and control operations to ensure the serviceability of 504.268 km of roads.

Description of the service

The purpose of the contract is to ensure the execution of road surveillance and assistance operations, conservation operations and the programming, monitoring and control operations indicated in the contract in order to guarantee road serviceability.

Description of the work:

- **Road surveillance and assistance operation:** any operation that includes the work and services necessary to maintain service and safety levels.
- **Conservation operation:** any systematic operation required for the ordinary conservation of the elements comprising the civil works, vertical signage and road safety barriers or to maintain their level of service.

- **Programming, monitoring and control operation:** any operation that includes the work necessary to carry out the studies, programming, monitoring, control and establishment of information necessary to carry out the conservation work.
- **Supplementary unit:** unit of work or material that may be carried out in addition to a specific conservation operation.
