

Landscape and environment / Maintenance of green spaces

Green space conservation in Granada Area A

Client

Municipal Government of Granada

Amount

-

Location

Granada

Period of the work

May 2018. Duration: 4 years (+ 2 years)

Scope

Maintenance and cleaning of the green spaces in the Norte, Chana, Beiro, and Genil districts, including comprehensive cleaning of the Parque Almunia de Aynadamar, Parque Acuático de Almanjávar, Parque de las Alquerías, and Parque Eras de Cristo. This also involves maintenance of the trees along the roads, plant health, and maintenance of the water system.

Description of the service

This service includes the conservation and maintenance of urban parks, landscaped areas (community areas, plazas, etc.) and trees lining streets, including rows of palms, planters, floral structures, trees at public schools, green spaces near roads (dividers, banks, boulevards, and roundabouts), seasonal gardening,

peri-urban parks, and other municipal areas designated as green spaces in four of the Granada's neighborhoods (Zone A).

This service covers an area of 527,336 m2.
